SmartSource® Receipt

Eliminate the Need for a Separate Receipt/Validation Printer at the Teller Station.

The advanced features and functions of the standard SmartSource printer further extends its capabilities, enabling integrated printing and scanning at the teller station. In addition to endorsing customer-deposited checks, the SmartSource printer is capable of validating internal cash tickets and an array of teller documents including customized customer deposit receipts, envelopes, and even official checks.

Let SmartSource Print Your Receipts and Validate Your Control Documents.

Consolidating multiple functions to a single device allows the financial institution (FI) to decrease transaction processing time and recapture valuable teller counter space while significantly lowering their cost per teller station.

By deploying SmartSource scanners, tellers are able to process the majority of transactions without having to leave the teller cage.

Small Footprint for Efficient Printing and Scanning!

| Features | Benefits |
|---|---|
| Extends the functionality of the SmartSource scanner | No capital investment for separate printers, lowering the total cost of ownership |
| Prints customer receipts with exceptional 600 dpi quality | FI logo can be branded on customer documents Maintains highest quality printing for all transactions |
| Eliminates maintenance and consumables associated with receipt printers | Achieves significantly lower operating costs |
| Informs teller when printer is low on ink | Allows cartridge replacement before print degrades and reduces waste |

Reduce Teller Solution Costs
